

In 1985, you'd only have to work 43 hours at minimum wage to pay for tuition. Today, you'd have to work 645-740 hours per semester. The minimum wage today is worth less after inflation than in 1985.

UT's administration claims that rising costs are forcing them to raise tuition. But which costs are really rising? The highest-paid 10% of UT Austin employees make a combined total of \$270m, almost 4 times as much as the university's financial aid budget. While top administrators give each other raises and benefits, students are struggling with heavy course loads, multiple jobs, and mountains of debt, and faculty and staff all over campus are facing budget cuts and outsourcing. It's time we take a stand and make our voices heard.

Education is a human right.
